OMKAR AVASARE

B.Tech Information Technology Student
Pune, Maharashtra, India
(+91) 9322384479 | omkaravasare2@gmail.com | www.linkedin.com/in/omkar-avasare | github.com/omkaravasare

PROFESSIONAL SUMMARY

Information Technology undergraduate with experience developing scalable backend services, full-stack web applications, and machine learning systems. Proficient in Java, Python, and JavaScript with hands-on experience building RESTful APIs using Spring Boot and interactive interfaces with React. Experienced in deploying cloud-native applications on AWS with auto-scaling infrastructure and implementing ML models using LightGBM, XGBoost. Passionate about clean software architecture, CI/CD practices, and building intelligent data-driven systems.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, SQL
Frameworks and Libraries: Spring Boot, ReactJS, Node.js, OpenCV, LightGBM, Scikit-learn
Databases: MongoDB, MySQL
DevOps & Infrastructure: Docker, Kubernetes, Kafka, GitHub Actions (CI/CD).
Tools and Technologies: Git, GitHub, JWT Authentication, RESTful APIs, Postman APIs
Cloud Technologies: AWS ,Google Cloud Platform , Azure
Additional Skills : Agile Development , Microservices Basics , Git-based Version Control

EDUCATION

AISSMS Institute of Information Technology, Pune — 2023 – 2027
B.Tech - Information Technology (Honors :Cybersecurity) — *CGPA: 7.8 /10.0*
Shri Shivaji Vidyamandir and Junior College — 2021 – 2023
Higher Secondary Certificate (HSC), Science Stream — *Grade : First Class*
Mar Ivanios Convent School — 2011 – 2021
Secondary School Certificate (SSC) — *Percentage: 90%*

PROJECTS

LightGBM-Based Machine Learning Approach for Sales Prediction (MIS Project) | Python, LightGBM, Flask, Optuna
Built a sales forecasting system using **LightGBM** with feature engineering and Optuna tuning, improving prediction accuracy on Walmart sales data. Deployed as a **Flask web app** with real-time forecasts and visual dashboards, enabling data-driven inventory optimization and strategic planning; published research in IJARSCT journal.

BudgetWise: AI Powered Personal Finance Manager | Java 17, Spring Boot 3.2, React 18, MongoDB, Groq AI
Developed a **Java full stack** personal finance manager featuring **Spring Security JWT authentication**, BCrypt password hashing, and **RESTful APIs** for complete expense and budget management backed by **MongoDB**. Integrated Groq AI (Llama 3.3 70B) for personalized financial insights. Project features interactive analytics dashboards along with monthly report generation with a responsive React 18 frontend using Axios for seamless API consumption.

Engineered and Deployed Highly Available Web Application on AWS | AWS Cloud
Architected scalable infrastructure using **EC**2 Auto Scaling Groups and **Application Load Balancer** for high availability and fault tolerance. Implemented multi-AZ deployment with automated scaling policies to handle variable traffic loads and ensure 99.9% uptime.

Additional Projects: Developed diverse ML, IoT, and Full Stack projects including predictive analytics systems, management platforms, and automated solutions across the software development lifecycle

EXPERIENCE

Java Full Stack Intern

Infosys Springboard | Dec 2025 - March 2026

Technical Secretary

IT Students Association: AISSMS IOIT – Pune, India | August 2025 - Present

Data Analytics Intern

VI Foundation & AICTE virtual internship | October 2024 -December 2024
