

OMKAR AVASARE

Information Technology Undergraduate | Full Stack Development | Backend & Cloud Engineering

omkaravasare2@gmail.com | +91 9322384479 | [linkedin.com/in/omkar-avasare](https://www.linkedin.com/in/omkar-avasare) | github.com/omkaravasare1 | Pune, India

Portfolio : <https://devportfolio31.vercel.app/>

PROFESSIONAL SUMMARY

Backend and cloud-focused developer with experience building scalable REST APIs using Java and Spring Boot and developing full-stack web applications with React. Experienced in deploying cloud-native systems on AWS with autoscaling infrastructure and CI/CD pipelines. Familiar with containerized microservices, distributed system fundamentals, and integrating AI capabilities into production applications. Passionate about clean software architecture and building scalable data-driven systems.

EDUCATION

B.Tech in Information Technology (Honors: Cybersecurity)

Expected Graduation: 2027

AISSMS Institute of Information Technology, Pune University

WORK EXPERIENCE

Java Full Stack Intern | Infosys Springboard | Remote/India

Dec 2025 – Mar 2026

- Designed and developed RESTful APIs using Java 17 and Spring Boot, implementing JWT-based authentication and authorization flows.
- Built and integrated React.js frontend components consuming backend APIs via Axios, ensuring responsive and accessible UI.
- Participated in Agile sprints, conducted code reviews, and documented API contracts using Postman and Swagger.
- Collaborated with cross-functional teams to deliver feature releases aligned with business requirements.

Technical Secretary | IT Students Association: AISSMS IOIT, Pune

Aug 2025 – Present

- Organize and coordinate technical events, workshops, and hackathons for the IT department student body.
- Managed technical communications, documentation, and event logistics for association activities.
- Mentored junior students in web development, cloud computing, and open-source contribution.

Data Analytics Intern | VI Foundation & AICTE Virtual Internship | India

Oct 2024 – Dec 2024

- Performed exploratory data analysis (EDA) on real-world datasets using Python (Pandas, NumPy, Matplotlib).
- Built and evaluated ML models using Scikit-learn; documented findings in structured reports for stakeholders.
- Developed data visualization dashboards to surface actionable insights from large datasets.
- Applied feature engineering techniques to improve model performance on classification and regression tasks.

PROJECTS

BudgetWise: AI Powered Personal Finance Manager | Java 17, Spring Boot 3.2, React 18, MongoDB, Groq AI 2025

- Developed a full-stack personal finance manager with Spring Security JWT authentication and BCrypt password hashing for secure user management.
- Built RESTful APIs for complete expense and budget management, backed by MongoDB with optimized data modelling.
- Integrated Groq AI (Llama 3.3 70B) to deliver personalized AI-driven financial insights and recommendations.
- Designed interactive analytics dashboards and monthly report generation with a responsive React 18 frontend using Axios.

Cloud-Deployed Sales Forecasting Service | Python, LightGBM, Flask, Optuna

2024

- Built a sales forecasting system using LightGBM with advanced feature engineering and Optuna hyperparameter tuning on Walmart sales data.
- Deployed as a Flask web application with real-time forecasting endpoints and visual dashboards for inventory optimization.
- Published findings in the IJAR SCT journal, enabling data-driven strategic planning for supply chain stakeholders.

GenAI Driven Financial Intelligence Platform | *Python, FastAPI, Next.js, React, Groq/Llama LLM*

2024

- Built a GenAI-powered platform using FastAPI to process uploaded financial reports, extracting key data via PyMuPDF and spaCy NLP pipelines.
- Integrated LLMs (Groq/Llama) and NetworkX to generate AI-driven insights, financial relationship graphs, and automated presentation summaries.
- Designed interactive Next.js and React dashboard with Tailwind CSS to visualize financial ratios, analytics, and insights for analysts and investors.

Highly Available Web Application on AWS | *AWS EC2, Auto Scaling, ALB, Multi-AZ*

2024

- Architected scalable AWS infrastructure using EC2 Auto Scaling Groups and Application Load Balancer for high availability and fault tolerance.
- Implemented multi-AZ deployment with automated scaling policies to handle variable traffic loads, achieving 99.9% uptime SLA.
- Configured CloudWatch monitoring, alarms, and logging for proactive incident detection and infrastructure observability.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, SQL

Frameworks & Libraries: Spring Boot, ReactJS, Node.js, FastAPI, Flask, OpenCV, LightGBM, Scikit-learn

Databases: MongoDB, MySQL

DevOps & Infrastructure: Docker, Kubernetes, Kafka, GitHub Actions (CI/CD), AWS EC2, Auto Scaling, ALB

Cloud Technologies: AWS, Google Cloud Platform, Azure

Tools & Technologies: Git, GitHub, JWT Authentication, RESTful APIs, Postman, Swagger, Agile/Scrum

CERTIFICATIONS & TRAINING

- Become a Solutions Architect (Migration and Modernization) - BeSA Cloud Academy
- Architecting on AWS - Dreamworld Tech
- Prompt Engineering for Developers - OpenAI
- Level 3 GenAI: Prompt Engineering - Google
- Java Full Stack Development - Infosys Springboard
- Data Analytics Virtual Internship - VI Foundation & AICTE
- Postman API Student Expert - Postman

ACHIEVEMENTS

- Winner at **InnoScribe - National level** Paper Presentation Competition at Bharati Vidyapeeth, Pune
- Consolation Prize winner at **Navdhara - State Level** Project Competition at PCCOER, Pune
- Volunteer at **AWS User Group Pune** - A Community of **20k+ Developers** and **Cloud Enthusiasts**
- Served as **President** of Microsoft Learn Student Ambassador Club, IOIT (2024-25)
- Co-Authored and Published 3 research papers in IJARST journal.
- Open Source Contributor **@GSSOC'24**
- Participated and Won Cultural Competitions at College Level
