PROFESSIONAL SUMMARY

Backend and cloud-focused software engineer with experience building scalable REST APIs using Java and Spring Boot and developing full-stack web applications with React. Experienced in deploying cloud-native systems on AWS with auto-scaling infrastructure and CI/CD pipelines. Skilled in containerized microservices, distributed system fundamentals, and integrating AI capabilities into production applications. Passionate about clean software architecture, and building intelligent data-driven systems.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript, SQL
Frameworks and Libraries: Spring Boot, ReactJS, Node.js, OpenCV, LightGBM, Scikit-learn
Databases: MongoDB, MySQL
DevOps & Infrastructure: Docker, Kubernetes, Kafka, GitHub Actions (CI/CD).
Tools and Technologies: Git, GitHub, JWT Authentication, RESTful APIs, Postman APIs
Cloud Technologies: AWS, Google Cloud Platform, Azure
Additional Skills: Agile Development, Microservices Basics, Git-based Version Control

EDUCATION

AISSMS Institute of Information Technology, Pune University 2023 – 2027
B.Tech - Information Technology (Honors :Cybersecurity) *CGPA: 7.8 /10.0*

PROJECTS

BudgetWise: AI Powered Personal Finance Manager | Java 17, Spring Boot 3.2, React 18, MongoDB, Groq AI
Developed a **Java full stack** personal finance manager featuring **Spring Security JWT authentication**, BCrypt password hashing, and **RESTful APIs** for complete expense and budget management backed by **MongoDB**. Integrated Groq AI (Llama 3.3 70B) for personalized financial insights. Project features interactive analytics dashboards along with monthly report generation with a responsive React 18 frontend using Axios for seamless API consumption.

Cloud-Deployed Sales Forecasting Service | Python, LightGBM, Flask, Optuna
Built a sales forecasting system using **LightGBM** with feature engineering and Optuna hyperparameter tuning to improve prediction accuracy on Walmart sales data. Deployed as a **Flask web app** with real-time forecasts and visual dashboards, enabling data-driven inventory optimization and strategic planning; published research in **IJARSCT journal**.

GenAI Driven Financial Intelligence Platform | Python , FastAPI ,Next.js, React, LLM integration (Groq/Llama)
Developed a GenAI-powered financial analysis platform using Python and FastAPI to process uploaded financial reports and extract key financial data using PyMuPDF and spaCy NLP pipelines. Built an interactive Next.js and React dashboard with Tailwind CSS to visualize financial ratios, insights, and analytics for analysts and investors. Integrated LLMs (Groq) and **NetworkX** to generate AI-driven insights, financial relationship graphs, and automated presentation summaries.

Engineered and Deployed Highly Available Web Application on AWS | AWS
Cloud Architected scalable infrastructure using EC2 Auto Scaling Groups and Application Load Balancer for high availability and fault tolerance. Implemented multi-AZ deployment with automated scaling policies to handle variable traffic loads and ensure 99.9% uptime.

EXPERIENCE

Java Full Stack Intern

Infosys Springboard | Dec 2025 - March 2026

Technical Secretary

IT Students Association: AISSMS IOIT – Pune, India | August 2025 - Present

Data Analytics Intern

VI Foundation & AICTE virtual internship | October 2024 -December 2024
