PROFILE / OBJECTIVE

B.Tech Information Technology student experienced in building AI-powered full-stack applications using MERN stack, Python, and cloud technologies. Published researcher with internship experience in software engineering and data analytics, seeking Software Engineering or GenAI roles. Participant at Russia Summer University Program, July 2026.

EDUCATION

AISSMS Institute of Information Technology, Pune
Bachelor of Technology (Information Technology)

2023–2027
CGPA: 7.96 | Honors: Cybersecurity

SKILLS

- **Programming:** Python, Java, JavaScript, C++
- **Frameworks & Libraries:** Spring Boot, ReactJS, Node.js
- **Databases:** MongoDB, MySQL, PostgreSQL, Oracle DB
- **Cloud & DevOps:** AWS, Google Cloud Platform, Azure, Docker, Kubernetes
- **Version Control & Collaboration:** Git, GitHub
- **AI/ML:** Generative AI, LLM Integration, Prompt Engineering
- **Backend & APIs:** FastAPI, REST APIs, JWT Authentication

INTERNSHIP / PROJECT EXPERIENCE

Java Full Stack Intern

Infosys Springboard | Dec 2025–Mar 2026

- Built RESTful APIs using Java 17 & Spring Boot with JWT authentication; integrated React.js frontend via Axios for a seamless full-stack application.
- Participated in Agile sprints with cross-functional teams; documented API contracts using Postman and Swagger.

Data Analytics Intern

VOIS & AICTE Virtual Internship | Oct 2024–Dec 2024

- Performed EDA and end-to-end data workflows using Python (Pandas, NumPy, Matplotlib); applied feature engineering for classification and regression tasks, improving model accuracy and pipeline efficiency.

ACADEMIC PROJECTS

BudgetWise: AI-Powered Personal Finance Manager

[Source Code](#)

Java 17, Spring Boot 3.2, React 18, MongoDB, Groq AI

- Developed a secure full-stack personal finance manager using Spring Boot, React, MongoDB, JWT authentication, and BCrypt password hashing.
- Integrated Groq AI (Llama 3.3 70B) to generate personalized financial insights while building responsive analytics dashboards and monthly reports.

ARCA - Automated Regulatory Compliance Assistant

[Source Code](#)

Spring Boot, React, SQL, JWT, REST APIs

- Developed a full-stack compliance management platform that automates regulatory tracking, compliance task assignment, and real-time monitoring for financial institutions.
- Implemented JWT authentication, role-based access control, audit trails, compliance dashboards, and governance-focused reporting to improve regulatory readiness.

GenAI Financial Intelligence Platform

[Source Code](#)

Python, FastAPI, Next.js, Tailwind CSS, Llama 3 (Groq)

- Built a full-stack GenAI platform that extracts text and tables from unstructured financial reports (PyMuPDF, OCR) and computes financial ratios, trend analysis, and risk scores through a FastAPI backend.
- Integrated Llama 3 via Groq for LLM-driven qualitative insights with a custom Hallucination Guard validating AI-generated figures against deterministic calculations, and built a Next.js dashboard with knowledge graph visualization.

LEADERSHIP AND COORDINATION ROLES

- **Technical Secretary** - Led planning and execution of 5+ technical workshops while mentoring 80+ students in cloud, web development, and open source.
- **President, Microsoft Learn Student Ambassador (MLSA) Club** - Led Microsoft technology workshops and community initiatives for 100+ student members.

CERTIFICATIONS

- Become a Solutions Architect (Migration and Modernization) – BeSA Cloud Academy
- Architecting on AWS – Dreamworld Tech
- AI and Full Stack Development – Infosys Springboard

EXTRACURRICULAR ACHIEVEMENTS / ACTIVITIES

- Won **First Prize** in a **National-Level Paper Presentation Competition**.
- Participated in the **Summer University Program, Russia** and Won **Third Prize** in an **International Hackathon**.
- Co-authored 3 research papers published in the IJARSC journal.
- Volunteer at **AWS User Group Pune** – A community of 20k+ developers and cloud enthusiasts.
